## 1 Introduction

The ILIAS-Plugin MultiAssign allows an ILIAS-User to assign another ILIAS-User to multiple Courses. This functionality can be reserved to one or more global roles. A User only can assign others to courses where he has the right for member-modifications.

## 2 Installation

### 2.1 Install Router

The Subscription-Plugin needs a Router-Service to work. Please install the Service first:

You start in your ILIAS root directory

```
cd Services
```

```
git clone https://github.com/studer-raimann/RouterService.git Router
```

Switch to the setup-Menu of your Installation and perform a Structure-reload in the Tab Tools. this can take a few moments. After the reload has been performed, you can install the plugin.

### 2.2 Install Plugin

Start at your ILIAS root directory

```
mkdir -p Customizing/global/plugins/Services/UIComponent/UserInterfaceHook/
```

```
cd Customizing/global/plugins/Services/UIComponent/UserInterfaceHook/
```

```
git clone https://github.com/studer-raimann/MultiAssign.git
```

As ILIAS administrator go to "Administration->Plugins" and install/activate the plugin.

## 3 Usage of the Plugin

### 3.1 Configure Plugin

As ILIAS administrator go to "Administration->Plugins" and click 'Configure' in the MultiAssign-Action-menu.

## 3.2 Usage

### 3.2.1 Personal Desktop

If your User Account is in at least on off he configures Roles and the option "Multi-Assign-Button on Personal Desktop" is activated you see the new Button "Assign User" on your Personal Desktop. Click the Button to switch to the MultiAssign-Overview.

The screenshot shows the ILIAS Open Source eLearning interface. The top navigation bar includes 'Persönlicher Schreibtisch', 'Magazin', and 'Administration'. The main content area is titled 'Übersicht' (Overview). It features several sections: 'Systemnachrichten' (System Messages) with notifications about course completion, 'Ausgewählte Angebote' (Selected Offers) with a list of courses and actions, 'Multi-Zuweisung' (Multi-Assignment) with a button to assign users, 'Kalender' (Calendar) for December 2014, and 'Mail' (Email) with a list of messages. The user is logged in as 'root user'.

### 3.2.2 Search for user

In the first screen you can search the user database and select the desired User-Account.
