1   Introduction

The ILIAS-Plugin MultiAssign allows an ILIAS-User to assign another ILIAS-User to multiple Courses. This functionality can be reserved to one or more global roles. A User only can assign others to courses where he has he the right for member-modifications.

2   Feature Overview

PL-Version	Changes
1.2.00	First Release: • Assign one user to several courses • Select the Course-Role for each course • Send a customizable summary-email to the user
1.3.00	Support for ILIAS 5

3   Installation

ILIAS 4.4 does not include ActiveRecord. Therefore please install the latest Version of ActiveRecord before you install the plugin. If you are using ILIAS 5, please got to step 3.2

Start at your ILIAS root directory

```
mkdir -p Customizing/global/plugins/Libraries/
cd Customizing/global/plugins/Libraries
git clone https://github.com/studer-raimann/ActiveRecord.git
```

3.1   Install Router

The Subscription-Plugin needs a Router-Service to work. Please install the Service first:

You start in your ILIAS root directory

```
cd Services
git clone https://github.com/studer-raimann/RouterService.git Router
```

Switch to the setup-Menu of your Installation and perform a Structure-reload in the Tab Tools. this can take a few moments. After the reload has been performed, you can install the plugin.

3.2   Install Plugin

Start at your ILIAS root directory

```
mkdir -p Customizing/global/plugins/Services/UIComponent/UserInterfaceHook/
cd Customizing/global/plugins/Services/UIComponent/UserInterfaceHook/
git clone https://github.com/studer-raimann/MultiAssign.git
```
